# The most important room in the house for the holidays: The Kitchen

Which is obvious, if you're hosting a holiday meal or celebration. But even if you've just got company coming over to watch the next game... where's everybody hanging out AFTER the game? Well your answer might be some hip bar/club/party, but the truth is (and everybody knows this) POST your hosted game-watching, everybody hangs out in the kitchen... even if they're going to that hip bar/club/party later.

Getting together and sharing a meal and good times with family and friends is what the holiday season is all about - and the room at the center of all this? The Kitchen.

The culinary and entertainment centerpiece featured on this page is a Toltec Custom Homes creation.

"I'm thankful every day that Greg not only has the talent to conceptualize and build such beautiful gourmet kitchens, but also has the talent to create gourmet meals in them, too," says Monica Hammond, CEO and Owner/Realtor for Toltec Custom Homes, of her husband, partner and President of the company, Greg Hammond. ...And their daughter Dominique agrees.
